SKILLS

- Skilled in Test Planning, Test Case Design, and Execution (Functional, Regression, Integration).
- Experienced in Defect Reporting using TestLink and Excel.
- Strong focus on UI, Usability, and End-to-End Testing across platforms and browsers.
- Effective in documenting and communicating issues for prompt resolution.
- Programming languages: Java, C#, php.
- Database Language: MS-SQL
- Test Management Tool: Test Link.

CERTIFICATIONS

SOFTWARE TESTING

Professional Software Testing certification from Squad Infotech.
- Manual Testing
- Automation Testing: (Selenium, Webdriver)
- Automation farmwork: TestNG, Extend Report.

Some Highlights

- 2.5+ years of experience in Manual Testing and Automation Testing of web and mobile applications, with a strong focus on quality assurance.
- Expertise in developing and executing Test Cases, Test Plans, and Test Scenarios for functional, regression, and integration testing.
- Developed automation framework using Selenium WebDriver for efficient testing and faster releases.
- Hands-on experience with database testing (SQL) to validate data integrity and ensure correct implementation of business rules in applications.
- Strong proficiency in UI Testing, ensuring an intuitive, user-friendly experience across platforms and browsers.
- Cross-browser and cross-platform testing to ensure consistent functionality and design across major browsers and mobile devices.
- Ability to effectively collaborate with developers and stakeholders, ensuring issues are promptly addressed and resolved.
- Strong attention to detail, with a focus on delivering high-quality, bug-free software.

PROJECTS

1. Project Name: Property Tax Assessment and Collection.

Description : A web-based application designed to streamline property tax management for municipalities.

It allows users to calculate, pay, and track property taxes efficiently. The system features:

- **Tax Calculation Engine:** Automated calculations based on property details and local tax rates.
- **Payment Integration:** Secure payment gateway integration for online payments.
- **Reporting:** Generates detailed tax reports and transaction history.

Role: Worked on manual and automation testing for a web-based property tax application, ensuring accurate tax calculations, payment processing, and reporting.

- Developed an automation framework using Selenium to streamline functional and regression testing.
- Involved in database testing to verify data integrity, validate queries, and ensure accurate tax records and reports.
- Also worked with payment gateways integration
- Collaborated with developers to identify and resolve issues, ensuring compliance with regulatory standards.

Project 2 : Trade License Web-Based Application

A comprehensive web-based system designed to manage the issuance, renewal, and tracking of trade licenses for businesses. The application streamlines the process of applying, renewing, and managing trade licenses, ensuring compliance with local laws and tax regulations.

- **Key Features:**
  - **License Issuance & Renewal:** Streamlined workflows for businesses to apply for, renew, and track trade licenses.
  - **Reporting & Analytics:** Provides detailed reports for administrators on license issuance, renewals, and revenue collection.

Role: Tester & Business Logic

- **Business Logic Development:** Played a key role in **designing and developing the business logic** for the trade license application, ensuring accurate license fee calculations, document validation, and workflow automation.
- **Requirement Gathering:** Coordinated with clients to **gather detailed requirements**, understand business needs, and translate them into functional specifications.
- **Database Testing:** Ensured data integrity by performing **database testing** to validate the storage and retrieval of trade license information.
- **Client Communication:** Worked closely with clients to clarify requirements, provide regular project updates, and ensure the software met their expectations.
- **Collaboration:** Collaborated with cross-functional teams, including developers and project managers, to ensure the timely delivery of features and successful project completion.

Passionate about delivering high-quality software solutions, with a strong focus on user-centric design, efficient testing processes, and continuous learning to keep up with evolving technologies in software testing
